

Instruction

XIRIUM PRO | Directional remote antenna NXPA-18-18-18

1 Cable

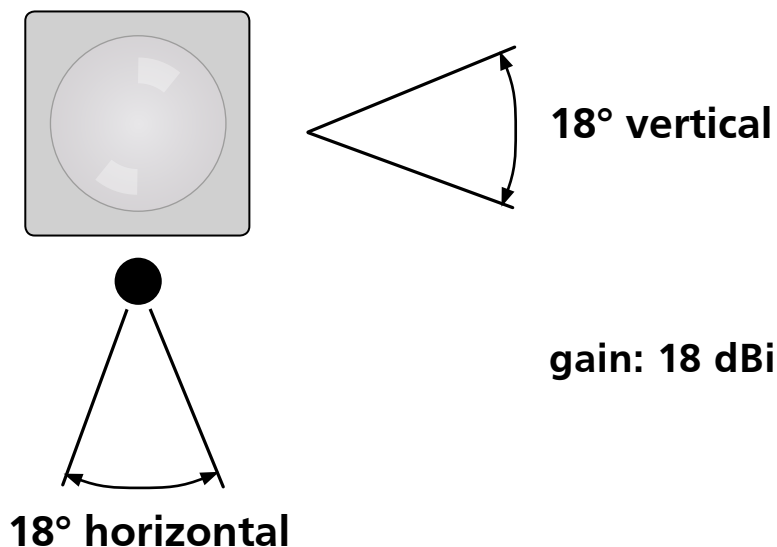

Please use Neutrik's approved **cable NKXPA-5** to connect the antenna to a XIRIUM PRO receiver.

NOTE!

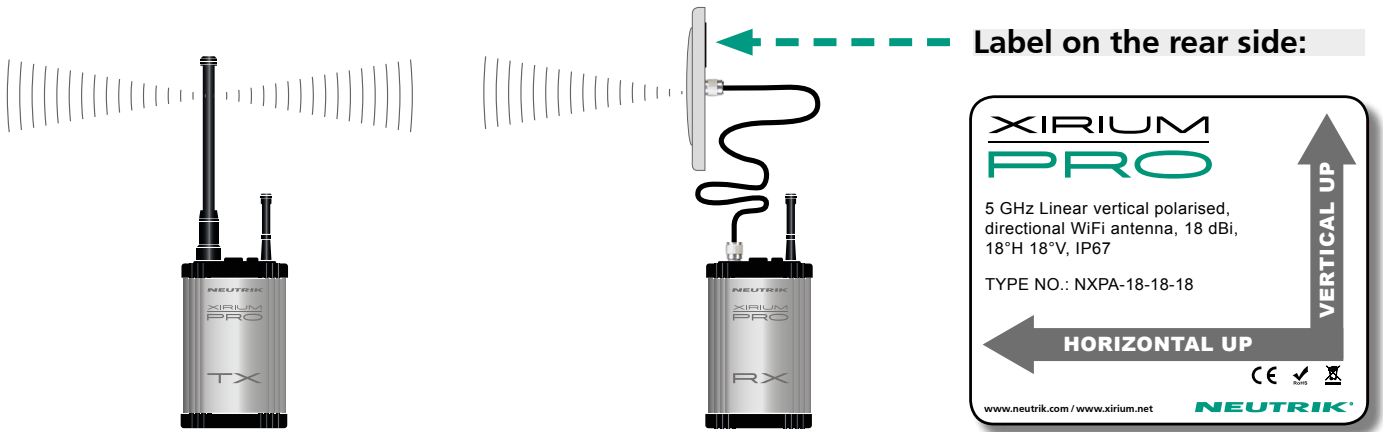

Due to RF regulations, the use of a directional antenna on a transmitter or repeater, is not allowed!

2 Pattern

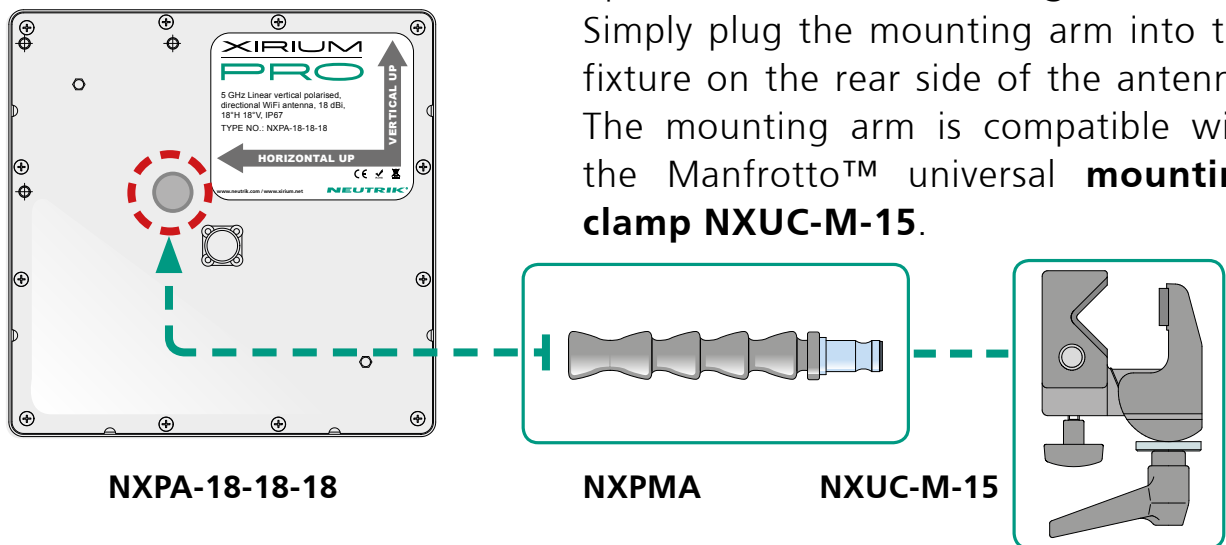

3 Alignment

To ensure the antenna is properly oriented, use the polarity markings indicated by a label on the rear-side of the antenna. The antenna is typically setup vertically polarized.

4 Mounting

This directional antenna may be remote mounted with the use of Neutrik's optional **NXPMA mounting arm**. Simply plug the mounting arm into the fixture on the rear side of the antenna. The mounting arm is compatible with the Manfrotto™ universal **mounting clamp NXUC-M-15**.
