

## Neutrik Quality Statement

Neutrik commits itself to innovative, quality products, service excellence and environmental protection.

Our quality policy is to develop, produce and deliver on time, products and services that meet or exceed customer expectations. In order to do this, we have implemented a quality systems and processes that are continually being improved to satisfy our customer needs.

Neutrik operates to a process oriented quality management system (QMS) in conformance to the requirements of the internationally recognized ISO 9001:2008 quality standard.

The key elements of this strategy are:

- SQS, IQNet, LQS ISO 9001:2008 certified
- AQL inspection system according ISO 2859 and MIL-STD-105D
- Multistage quality control system
- Strong management and employee commitment to quality
- Proper and continuously improved designs
- Well selected sub-suppliers

Continuous improvement is a key issue at Neutrik. The QMS and quality policy are regularly reviewed under the guidance of the Chief Executive Officer. At each review, objectives and improvements are established and previous targets are reviewed. Also SQS (Swiss Association for Quality and Management Systems) is periodically reviewing our processes and procedures. Our main driver for continues improvement processes is Six Sigma.

Neutrik recognizes that the protection of the earth environment is one of the most important subjects of mankind and consider it important to contribute positively to the preservation of environmental resources. Our products are developed and manufactured in an environmentally acceptable manner. For us, environmental protection represents a long-term obligation to preserve resources for future generations. In this respect we agree with and fulfil international standards like RoHS, REACH etc. as well specific requirements of our customer base.
